Supervisors: Senior Lecturer J Goodfellow & Professor AH Henderson

Current research interests

1. Heart Failure (HF)

- Study of structural and functional vascular indices in patients with HF
- Study of the epidemiology, natural history and prognosis of various phenotypes and causes of HF
- Study of current therapeutic approaches of arrhythmias and valvular heart disease (percutaneous interventions) in HF patients

2. Imaging in Cardiology

- Echocardiography: study of left ventricular diastolic function in relation to the coronary microcirculation in patients with hypertension, chronic kidney disease, (peritoneal) dialysis, and renal transplantation
- Invasive imaging methods. Characterization of atheromatous plaque for the diagnosis of vulnerable plaque and construction of algorithms that allow automatic characterization of atheromatous plaques using invasive imaging methods and novel methods of image processing

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 77711.

The consortium includes 12 partners from 8 different EU countries and one US partner. The 2nd Department of Cardiology, represented by Professor Michalis has a key role in the clinical studies. Dr Naka is a member of the team.

International collaborations

Since 2018, Dr Naka has a research collaboration with the Cardiovascular Research Foundation (CRF), New York, NY (Associate Professor D Karmpaliotis, Assistant Professor I Kosmidou). This collaborations focuses on:

- Clinical studies on the role of shear stress on the development of atherosclerosis and in-stent restenosis
- Modelling studies on the role of left atrium and left atrial appendage shear stress on the development of left atrial thrombus in patients with atrial fibrillation.

Dr Naka has organized within the University of Ioannina research facilities such as:

1. Research Laboratory for vascular studies; non-invasive assessment of endothelial function, non-invasive assessment of aortic stiffness (pulse wave velocity, central aortic pressure, augmentation index)
2. Research Laboratory for echocardiographic studies in experimental animal work; for the study of heart failure pathophysiology and treatment
